Release Date: November 20, 2020. You order a closed box of 24 Commander Legends booster packages, only for in-store pickup on or after November 13, 2020! Includes Mana Confluence Buy-a-Box promo! DRAFT COMMANDER'S HERE. Draft with the first booster package designed for Commander—a Magic format about fighting your friends in epic multiplayer games. Grab 3 packs, select 2 cards at once, and add some ground to the Commander's deck of 60 cards—then show off in this exciting free game with up to 8 friends. TWO LEGENDS PER PACK. Each Commander Legends Draft Booster Pack contains 2 legendary cards—upgrade your deck with a classic commander reprint or 1 of the 71 commanders introduced on the set. INTRODUCING FOIL ENGRAVED CARDS. Commander Legends debuted a special type of foil—a foil-engraved card with a beautiful metal frame. In some Commander Legends Draft Boosters, you can find showcase legends engraved with foil or planeswalkers without the usual foil. How to Build a Commander Legend: 1. Take 3 Boosters and Draft 2 Cards at once. Unlike in other Commander forms, you can compose and play copies of the same card you want. Remember to keep an eye on the powerful legendary creatures to play as your commander! 2. Build a Commander Deck of 60 Cards. Add some ground and build your deck. Let your commander guide you! Every legendary on the set can shine with the right set of cards that back it up. Read carefully and look for cards that support their strengths. 3. Fight with 4–8 Friends. Draft with four or eight players, then play a game in a group of four. Each draft of Commander Legends is a freewheeling back and forth battle in which alliances are formed, friends are betrayed, and revenge is avenged with revenge. In the end, only one player will be left standing . . . until the next draft begins, of course! CONTENTS: 20 Magic cards + 1 ad/token per pack, with 2 legends, at least 1 rare, and 1 foil each. Since Amazon has allowed some of these pre-orders, and thus some stores are starting to sell at the same price, want to warn anyone who orders at \$125 similar to the PSA ZNR Set Booster yesterday, this price is not a good entry price for the product. I was selected on my comments that didn't like WotC and this early Amazon listing (which I still don't recommend, but recognize Amazon has a good tracking and price cancellation policy). But when stores start pre-ordering this early, it's tempting to think anything under \$125 should be considered. The distributor price for the Commander Legends Draft Booster Box is \$1 higher than the normal set of Draft Booster Box (\$84 vs. \$83), with the Collector variant being \$5 higher (\$175 vs \$170 for the ZNR Collector). And similar to other Draft Booster products, this is not a limited print run product, it is printed on demand. If you pre-order to secure the draft experience in Week 1, that premium may be worth it, but as a \$125 containment specification is way out of whack with what distributors are charging (similar to Amazon listing \$120 for ZNR Draft Boosters). I suspect that like ZNR Set Boosters, prices will fall closer to \$90 near or shortly after release. Page 2 34 comments Esports Products Play Story News Locator Card Database Account 71 new legend. Great reprint. New mechanics. And - wait for it - Draft Boosters for Player Commander! Experience the best multiplayer format like never before.
